EKSAMENSBEVIS

Thor Wessel Lindberg
Cpr-nr. 270497-1357

har den 9. juni 2022 gennemført

Kandidatuddannelsen i informationsteknologi - Digital design og kommunikation

og har hermed ret til at betegne sig

Cand.it. i digital design og interaktive teknologier

jf. Bekendtgørelse om universitetsuddannelser tilrettelagt på heltid (uddannelsesbekendtgørelsen), som fastsat af Uddannelses- og Forskningsministeriet i henhold til Universitetsloven.

Udskrift af eksamensprotokol, kompetenceprofil samt engelsksproget Diploma Supplement er vedlagt.

Jens Christian Godskesen
Rektor

4. august 2022

EKSAMENSPROTOKOL

Kandidatuddannelsen i informationsteknologi - Digital design og kommunikation

IT-Universitetet i København bekræfter hermed, at *Thor Wessel Lindberg* (cpr-nr. 270497-1357) har bestået følgende studieaktiviteter:

Bedømmelses-dato	Studieaktivitet	7-trins-skala	ECTS skala	ECTS point	Eksamens-sprog[1]
	Obligatorisk				
2021-06-28	Designdrevet innovation	10	B	7.50	dansk
2021-06-30	Data design	7	C	7.50	engelsk
2021-06-23	Experimentelt design i praksis	10	B	7.50	engelsk
2022-01-13	Cross-Disciplinary Team Work	Bestået	Passed	7.50	engelsk
2021-01-20	Brugere i kontekst	10	B	7.50	engelsk
2021-01-27	Programmering af mobile applikationer	Bestået	Passed	7.50	engelsk
2021-01-20	Avancerede designprocesser	12	A	15.00	dansk
	Specialisering				
2021-06-24	UX design I	4	D	7.50	engelsk
2022-01-31	UX design II	10	B	15.00	engelsk
	Valgfri				
2022-01-07	Projekt: Annotation Task Design in Medical Imaging	7	C	7.50	engelsk
	Speciale				
2022-06-09	Type-Extensible Object Notation: JSON with Syntax for Types	02	E	30.00	engelsk

Samlet omfang af beståede studieaktiviteter:	120 ECTS-point. Hver aktivitet skal bestås for sig.
Svarende til	2 års studium på fuld tid.
Vægtet gennemsnit:	7.14, beregnet som gennemsnit af alle karaktergivne studieaktiviteter, vægtet efter ECTS point.

[1] IT-Universitetet har ikke altid oplysning om eksamenssprog ved eksaminer der er afholdt på andre universiteter.

DIPLOMA

Thor Wessel Lindberg
Civil reg. no. 270497-1357

has on 9 June 2022 completed the programme

Master of Science (MSc) in IT - Digital Design and Communication

and has obtained the right to use the title

Master of Science (MSc) in Information Technology, Digital Design and Interactive Technologies

The degree has been awarded pursuant to the Ministerial Order on Bachelor's and Master's Degree Programmes at the Universities, as laid down by the Danish Ministry of Higher Education and Science pursuant to the Danish Act on Universities.

A transcript of the graduate's academic record is enclosed together with a Competence Profile and a Diploma Supplement.

Jens Christian Godskesen
Vice Chancellor

4 August 2022

TRANSCRIPT OF ACADEMIC RECORD

Master of Science (MSc) in IT - Digital Design and Communication

The IT University of Copenhagen hereby confirms that *Thor Wessel Lindberg* (civil. reg. no. 270497-1357) has successfully completed the following study activities:

Examination Date	Study Activity	7-point-scale	ECTS scale	ECTS credits	Examination Language[1]
	Mandatory				
2021-06-28	Design-Driven Innovation	10	B	7.50	Danish
2021-06-30	Data Design	7	C	7.50	English
2021-06-23	Experimental Design in Practice	10	B	7.50	English
2022-01-13	Cross-Disciplinary Team Work	Bestået	Passed	7.50	English
2021-01-20	Users in Context	10	B	7.50	English
2021-01-27	Programming Mobile Applications	Bestået	Passed	7.50	English
2021-01-20	Advanced Design Processes	12	A	15.00	Danish
	Specialisation				
2021-06-24	UX design I	4	D	7.50	English
2022-01-31	UX Design II	10	B	15.00	English
	Electives				
2022-01-07	Project: Annotation Task Design in Medical Imaging	7	C	7.50	English
	Thesis				
2022-06-09	Type-Extensible Object Notation: JSON with Syntax for Types	02	E	30.00	English

Total number of credits earned:	120 ECTS-points. Each activity must be passed separately.
Corresponding to	2 years of full time studies.
Weighted average:	7.14, calculated as the average of all marks awarded for passed study activities weighted by ECTS credits.

[1] The IT University does not always have information on the examination language for examinations passed at other universities.

KOMPETENCEPROFIL

Kompetenceprofil for: *Thor Wessel Lindberg*, f. 27. april 1997.
Uddannelse: Kandidatuddannelsen i informationsteknologi - Digital design og kommunikation
Specialisering: UX Design

Viden og forståelse

Kandidaten opnår viden om og forståelse af:

- centrale principper og teorier baseret på højeste niveau af international forskning inden for digital design og designpocesser, herunder videnskabelige metoder, designmetoder, prototypingteknikker og designorienteret programmering anvendt i udviklingen af interaktive teknologier.
- centrale teorier omkring brugerpraksis med fokus på en teoretisk og analytisk refleksion over brugskontekster og vores engagement med digitale services og produkter på et kulturelt, organisatorisk og samfundsmæssigt niveau.
- design og kritisk analyse af digitale medieplatforme og interaktive teknologier med fokus på værdiskabelse for brugere, virksomheder, organisationer og andre interessenter.
- planlægning af eksperimentelle designprocesser og evnen til at identificere videnskabelige og forretningsmæssige problemstillinger i udviklingen af digitale services og interaktive systemer.

Færdigheder

Kandidaten udvikler følgende færdigheder til at:

- selvstændigt planlægge og udføre kontekst- og data-drevne studier til indsamling af materiale, der kan bruges i design og redesign af interaktive systemer og services.
- skabe designkoncepter og præsentere værdien af disse i et brugerdrevet, organisatorisk og forretningsmæssigt perspektiv.
- udvikle prototyper og teste digitale designs og services for skærmbaserede, mobile og fysiske artefakter og systemer, og vælge mellem passende prototypingteknikker og programmeringsmiljøer.
- kritisk reflektere over valg og anvendelse af analytiske værktøjer, designmetoder og -teknikker fra et tværfagligt udgangspunkt.
- formidle og diskutere forskningsbaseret viden om design og brugen af interaktive teknologier til fagfæller og ikke-specialister.

Kompetencer

Kandidaten opnår følgende kompetencer og kan:

- planlægge, udføre og lede komplekse design- og innovationsprocesser i globale eller distribuerede arbejdssituationer, tværfaglige teams og kommunikative kontekster.
- designe til forskellige digitale platforme i komplekse og uforudsigelige designsituationer.
- identificere og evaluere eksisterende og emergente teknologier, services og platforme fra et bruger-, organisations- og interessentperspektiv.
- analysere og kritisk vurdere brugen og brugere af digital design og services i en individuel, organisatorisk og samfundsmæssig kontekst.
- selvstændigt tage ansvaret for sin egen professionelle udvikling og specialisering.

COMPETENCE PROFILE

Competence profile for: *Thor Wessel Lindberg*, b. 27 April 1997
Programme: Master of Science (MSc) in IT - Digital Design and Communication
Specialisation: UX Design

Knowledge and Understanding

The graduate will develop research based knowledge and understanding of, and will be able to reflect on:

- Core principles and theories based on the highest level of international research within digital design and design processes including scientific methods, design methods, prototyping techniques and design-oriented programming as used in the development of interactive technologies.
- Central theories of user behavior and practice with a focus on a theoretic and analytic reflection on contents of use and our engagement with digital services and products on a cultural, organizational and societal level.
- Design and critical analysis of digital media platforms and interactive technologies with a focus on creating value for users, companies, organizations and other stakeholders.
- Planning of experimental design processes and the ability to identify scientific and business relate+D5d problems in the development of digital services and interactive systems.

Skills

The graduate will develop the following research based skills:

- Independently plan and execute context- and data-driven studies to collect material to be used in design and re-design of interactive systems and services.
- Create design concepts and present the value of these in user-driven, organisational and business related perspectives.
- Develop prototypes and test digital designs and services developed for screen-based, mobile and physical artefacts and systems and choose between suitable prototyping techniques and programming environments.
- Critically reflect on choice and use of analytical tools, design methods and design techniques in an interdisciplinary perspective.
- Communicate and discuss research-based knowledge of design and the use of interactive technologies to peers and non-specialists.

Competences

The graduate will develop the following research based competences:

- Plan, execute and manage complex design and innovation processes in global or distributed professional situations, interdisciplinary teams and communicative contexts.
- Design for different digital platforms in complex and unpredictable design situations.
- Identify and evaluate existing and emergent technologies, services and platforms from a user, organisational and stakeholder perspective.
- Analyse and critically evaluate the use and users of digital design and services in an individual, organisational and societal context.
- Independently take responsibility for his or her own professional development and specialisation.

DIPLOMA SUPPLEMENT

This Diploma Supplement follows the model developed by the European Commission, Council of Europe and UNESCO/CEPES. The purpose of the supplement is to provide sufficient independent data to improve the international "transparency" and fair academic and professional recognition of qualifications (diplomas, degrees, certificates etc.). The supplement is designed to provide a description of the nature, level, context, content and status of the studies that were pursued and successfully completed by the individual named on the original qualification to which this supplement is appended.

1. Holder of the Qualification

Family name(s): Lindberg
Given name(s): Thor Wessel
Date of birth: 27 April 1997
Civil registration number: 270497-1357

2. The Qualification

Name of the qualification and title conferred

In Danish Cand.it. i digital design og interaktive teknologier

In English Master of Science (MSc) in Information Technology, Digital Design and Interactive Technologies

Date of award: 9 June 2022

2.1. Main fields of study

The Master of Science programme in Digital Design and Interactive Technologies focuses on the use and users of digital designs and services and the hands-on explorations of interactive technologies as a design material. In the course of the programme, graduates will have obtained a complete understanding of the entire design process, from initial idea to full implementation and evaluation of a digital design or service with a strong technical focus.

2.2. Name and status of awarding institution

In Danish IT-Universitetet i København

In English IT University of Copenhagen

The IT University of Copenhagen is a state-recognised and state-financed higher education institution, which is regulated according to the Danish Act on Universities No. 754 of 17 June 2010.

2.3. Language(s) of instruction/examination

The language of instruction and examination is primarily Danish. Some courses are taught in English. If a course has been taught in English, the examination is usually also conducted in English.

3. Level of the Qualification

3.1. Level of qualification

A long-cycle research-based qualification, normally requiring a total of 5 years of full-time higher education studies: a 3-year Bachelor of Arts or Bachelor of Science degree from a higher education institution before entering the 2-year Master of Science programme at the IT University of Copenhagen.

3.2. Official duration of programme in credits

2 years = 120 ECTS credits (after a 3 year Bachelor of Arts or Bachelor of Science degree = 180 ECTS credits, i.e. a total of 300 ECTS credits). One term in a Master of Science degree corresponds to 30 ECTS credits.

The European Credit Transfer System (ECTS) is designed to help students and institutions in the European Union and other countries to compare degrees and study activities at universities and other higher education institutions. The workload per full academic year corresponds to 60 ECTS credits.

3.3. Access requirements

Admittance to the Master of Science in Information Technology programme requires a completed BA/BSc degree or equivalent higher education.

Qualifying programme: Sundhedsvidenskabelig bachelor

4. Contents and Results Gained

4.1. Mode of study

Full-time graduate programme equivalent of 120 ECTS credits (= 2 years).

4.2. Programme learning outcomes

The MSc study programme Digital Design and Interactive Technologies has as its objective that the student achieves the following competences and is able to:

- plan and manage complex and uncertain design and innovation processes in global or distributed work settings, multidisciplinary teams and communicative contexts.
- prototype and test digital designs and services for screen-based, mobile or physical artifacts and select between appropriate technical tools and prototyping techniques.
- identify and evaluate existing and emerging technologies, services and platforms from a user and stakeholder perspective.
- set up and carry out contextual and data-driven studies to collect material which can be used in the design and redesign of interactive systems and services.
- create design concepts and present their value in a user-driven perspective and on an organisational and business level.
- can design for a variety of digital platforms and services in uncertain and dynamic design situations.
- independently take responsibility for their own professional development and specialisation.

4.3. Programme details and individual grades/marks/credits obtained

Please refer to the enclosed transcript of the graduate's academic record. The IT University of Copenhagen uses the ECTS credit point system to directly relate our study activities to those at international universities. A study activity is either a course, a project or a master's thesis. A course of 7.5 ECTS credits typically stretches over 12 weeks and demands a weekly workload of 15 hours. A project of 7.5 ECTS credits has typically been prepared in a group of 2-5 students during a 4-week project period of full-time study. The master's thesis is a large project of 30 ECTS credits and corresponds to a workload of 6 months full-time study.

4.4. Grading scheme and (if applicable) grade distribution information

Please refer to the explanation of the grading scale on the final page.

4.5. Overall classification of the qualification

Not applicable for Danish qualifications.

5. Function of the Qualification

5.1. Access to further study

A completed Master of Science degree in Information Technology gives general access to PhD studies. Specific admission is subject to institutional approval.

5.2. Access to regulated profession

Within the framework of the programme, the student can acquire the requisite individual qualifications for specialised posts in business, industry, the public sector, and for research training programmes (PhD programme) in the field of information technology.

6. Additional Information

6.1. Additional information

The degree has been awarded pursuant to the Ministerial order on bachelor- and master's programmes at the universities, as laid down by the Danish Ministry of Higher Education and Science pursuant to the Danish Act on Universities, and to the Curriculum for the Master of Science Programme in Information Technology at the IT University of Copenhagen of 19 August 2015.

6.2. Institutional information

The IT University of Copenhagen is a teaching and research-based tertiary institution established in 1999 concerned with information technology (IT) and the opportunities it offers. It is funded to undertake both theoretical and applied research into the interaction and growing importance of information technology to society. The mission of the IT University of Copenhagen is to deliver internationally leading teaching and research which will enable Denmark to become exceptionally good at creating value with IT.

The IT University of Copenhagen conducts research in the fields of digital aesthetics and communication, theoretical computer science, innovation, and design and use of information technology. The IT University of Copenhagen offers PhD, Master of Science, Bachelor of Science, Master and Diploma programmes in the fields of Business, Digital Communication, Games and Software Development.

The teaching methods at the IT University of Copenhagen are varied and require a high degree of student activity. The teaching methods include lectures and projects - often in cooperation with private or public organisations - which in addition to developing the student's academic skills also develop the student's interpersonal skills.

6.3. Further information sources

Information in English about the IT University of Copenhagen (study programmes, course descriptions, number of students, research, organisation etc.) can be obtained from the IT University's homepage www.itu.dk, or from the Student Counsellors Office (e-mail: studentadvisors@itu.dk). General information about higher education in Denmark can be obtained from the following two homepages: Danish Ministry of Higher Education and Science (www.fivu.dk), and Danish Ministry of Children and Education (www.uvm.dk).

7. Certification of this Supplement

4 August 2022	Lene Rehder
Date	Lene Rehder, Head of Student Affairs and Programmes
Official stamp:	Student Affairs and Programmes The IT University of Copenhagen Rued Langgaards Vej 7 2300 Copenhagen S Denmark Phone +45 7218 5205 www.itu.dk

8. Information on the Danish Higher Education System

Cf. enclosure The Danish Higher Education System (April 2016)

The Danish Higher Education System April 2016

Public higher education institutions in Denmark are regulated by national legislation concerning degree structures, teacher qualifications and examinations. Accreditation in higher education is undergoing transition from programme-based accreditation to institutional accreditation. Programmes and institutions are accredited by national, independent accreditation agencies and the Accreditation Council.

Higher education institutions

Higher education is offered by five types of higher education institutions:

1. Business academies (Erhvervsakademi) offering professionally oriented short cycle and first cycle degree programmes.
2. University Colleges (Professionshøjskole) offering professionally oriented first cycle degree programmes.
3. Maritime Education and Training Institutions offering professionally oriented short cycle and first cycle degree programmes.
4. General and specialised research universities (Universitet) offering first, second and third cycle degree programmes in academic disciplines.
5. University level institutions offering first, second and third cycle degree programmes in subject fields such as architecture, design, music, and fine and performing arts.

Most higher education institutions are regulated by the Ministry of Higher Education and Science (type 1-5). The Ministry of Culture regulates a number of higher education institutions offering programmes within fine and performing arts (type 5).

Degrees in the Danish Higher Education System:

Danish qualifications levels	**Ordinary higher education degrees**	**Adult / continuing higher education degrees**	**Qualifications Framework for the European Higher Education Area - Bologna Framework**	**European / National Qualifications Framework for Lifelong Learning - EQF/NQF**
Academy Profession level	Academy Profession (AP) degree (90-150 ECTS)	Academy Profession (AP) degree (60 ECTS) (also known as Further Adult Education (VVU) degree)	Short cycle	Level 5
Bachelor's level	Professional Bachelor's degree (180-270 ECTS)*	Diploma degree (60 ECTS)	First cycle	Level 6
	Bachelor's degree (within the arts) (180 ECTS)			
	Bachelor's degree (180 ECTS)			
Master's level	Master's degree (within the arts) (120-180 ECTS)	Master degree (60-90 ECTS)	Second cycle	Level 7
	Master's degree (120 ECTS)**			
PhD level	PhD degree (180 ECTS)		Third cycle	Level 8

* Can be obtained through a full regular bachelor's programme (180-270 ECTS) or a top up bachelor's programme following an Academy Profession degree. ** A few Master's programmes are up to 180 ECTS.

Higher education institutions measure study activities in ECTS credits. 60 ECTS correspond to one year full-time study.

Qualifications framework

The qualification levels form the basis for the Danish National Qualifications Framework for Higher Education, which is certified in accordance with the overarching Bologna Framework according to the principles adopted by the European Ministers of Higher Education. Danish higher education qualifications at levels 5-8 of the Danish Qualifications Frame-work for Lifelong Learning (NQF) correspond with levels 5-8 of the European Qualifications Framework (EQF).

Admission and progression

General access to higher education in Denmark requires an Upper Secondary School Leaving Certificate or comparable qualifications. Admission to some particular programmes requires entrance examination or submission of a portfolio of artistic work. Holders of an Academy Profession degree can obtain a Professional Bachelor's degree within the same field of study through a top-up programme. Completion of a first cycle degree qualifies students for admission to the second cycle.

Ordinary Higher Education degrees

The Academy Profession degree is awarded after 90-150 ECTS and includes a period of work placement of at least 15 ECTS. The programmes are development-based and combine theoretical studies with a practical approach. Programmes are, among others, offered within Marketing Management, Computer Science and Chemical and Biotechnical Science. The Danish title is field of study followed by the abbreviation AK and the English title is AP Graduate in [field of study].

The Professional Bachelor's degree is awarded after 180-270 ECTS and includes a period of work placement of at least 30 ECTS. The programmes are applied programmes. They are development-based and combine theoretical studies with a practical approach. Examples of professional bachelor's degree holders are nurses, primary and lower secondary school teachers and certain types of engineers. The Danish title is Professionsbachelor i [field of study] and the English title is Bachelor of [field of study].

The Bachelor's degree from a university is awarded after 180 ECTS. The programmes are research-based and are offered in all scientific fields. The Danish title is Bachelor (BA) i [field of study] or Bachelor (BSc) i [field of study] and the English title is Bachelor of Arts (BA) in [field of study] or Bachelor (BSc) of Science in [field of study].

The Bachelor's degree (within the arts) is awarded after 180 ECTS. The programmes are based on research and artistic research. Programmes are offered within the fine arts. The Danish title is Bachelor (BA) i [field of study], Bachelor i musik (BMus) [field of study] or Bachelor i billedkunst (BFA) [field of study] and the English title is Bachelor of Arts (BA) in [field of study], Bachelor of Music (BMus) [field of study] or Bachelor of Fine Arts (BFA) in [field of study]. A higher education degree within theatre or filmmaking is awarded after 3-4 years of study (180-240 ECTS).

The Master's degree is awarded after 120 ECTS. The programmes are research-based and are offered in all scientific fields. The Danish title is abbreviated to Cand.[latin abbreviation of academic area] i [field of study]. The English title is Master of Arts (MA) in [field of study] or Master of Science (MSc) in [field of study].

The Master's degree (within the arts) is awarded after 120-180 ECTS. The programmes are based on research and artistic research. The Danish title is abbreviated to Cand.[latin abbreviation of academic area] [field of study]. The English title is Master of Arts (MA) in [field of study], Master of Music (MMus) [field of study] or Master of Fine Arts (MFA) in [field of study]. Music Academies offer a specialist degree of 2 to 4 years following the master's degree.

The PhD degree is awarded after 180 ECTS. PhD programmes are offered by the universities and some university level institutions offering degrees in the artistic and cultural field.

Detailed descriptions of degree levels can be found in the Danish Qualifications Framework at www.nqf.dk. Please consult the relevant Diploma Supplement for information about the learning outcome of any specific degree.

Adult and continuing higher education

The programmes normally consist of 2 years of part-time study, equivalent to 1 year of full-time study (60 ECTS credits). Certain master programmes require 1½ years of full-time study (90 ECTS credits). Admission requirements are a relevant educational qualification and at least 2 years of relevant work experience.

Adult and continuing education is available at levels corresponding to qualifications of the ordinary higher education system.

- The Further Adult Education degree (videregående voksenuddannelse/akademiuddannelse) is awarded after studies at short cycle level and gives access to diploma programmes.
- The Diploma degree (diplomuddannelse) is awarded after studies at first cycle level and gives access to master programmes.
- The Master degree (masteruddannelse) is awarded after studies at second cycle level.

The 7 point grading scale

The grading system used in all state-regulated education programmes as of September 2007 is the 7-point grading scale. Apart from the 7-point grading scale, pass/fail assessment may also be used. 02 is the minimum grade for passing an exam.

Description of grades: **12**: For an excellent performance displaying a high level of command of all aspects of the relevant material, with no or only a few minor weaknesses; **10**: For a very good performance displaying a high level of command of most aspects of the relevant material, with only minor weaknesses; **7**: For a good performance displaying good command of the relevant material but also some weaknesses; **4**: For a fair performance displaying some command of the relevant material but also some major weaknesses; **02** For a performance meeting only the minimum requirements for acceptance; **00**: For a performance which does not meet the minimum requirements for acceptance; **-3** For: a performance which is unacceptable in all respects.
